

## Low Power Consumption LDO AS7133 Series

### General Description

The AS7133 series are a group of positive voltage output, three –pin regulator, that provide a high current even when the input/output Voltage differential is small. Low power consumption and high accuracy is achieved through CMOS technology. They allow input voltages as high as 18V.

### Features

Output voltage: 3.3V

Output voltage accuracy: ±2%

High input voltage (up to 18V)

Ultra low quiescent current: 3.0uA(typ)

Low dropout voltage :80mV@Iout=40mA

Maximum output current: 250mA (within max.power dissipation)

Low temperature coefficient

Package: SOT23-3

### Typical Application

Cameras, video recorders

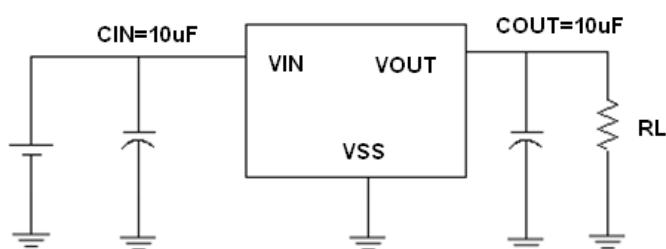

Voltage regulator for microprocessor
